Side Panel

ASSEMBLY GUIDE

IMPORTANT

1.. *The cubicle can be constructed either way up, for left or right hand opening.*

2.. *These instructions and list of parts assume that installation is done against solid or tiled walls. Hollow or "Stud - partition" walls will require alternative fixings. Please consult a hardware supplier for the correct type. It may also be necessary to consult your tiling supplier about the correct method for drilling your tiles.*

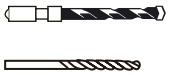
3.. *Please check this product for damage prior to starting the installation. No claims can be made after the products have been fitted, or after fitting has commenced.*

4.. *This is a 2 person installation.*

5.. *Please note the minimum and maximum adjustment for this product are based on perfectly plumb walls.*

Tools Required *Please note hand tools **NOT** supplied.*

Drill



7mm *Masonry Drill*
3.2mm *HSS Drill*

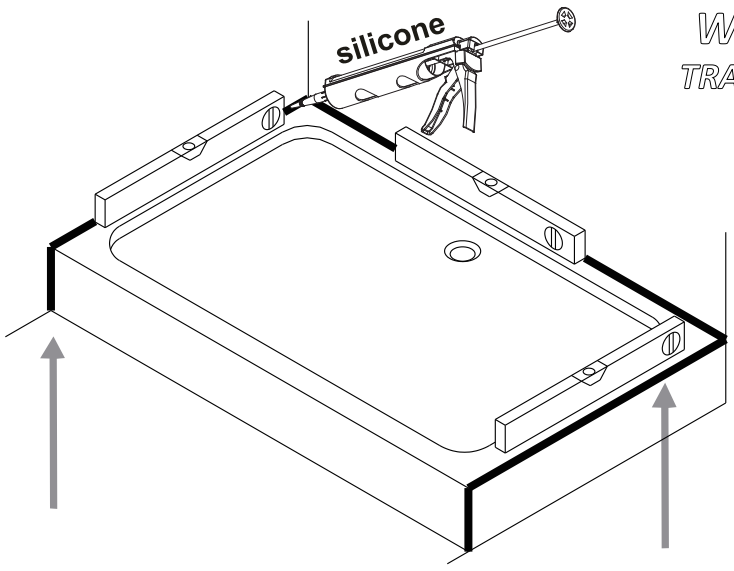
SN	Code	Description	Qty	Image
1	N/M	Side Glass Panel	1	
2	ALU13660	Cover Profile	1	
3	S1PS38-L/R	Corner Post Cap L/R	2	
4	S1PS05	Upright Profile Cap	1	
5	S1PS20	Cover Profile Clip	4	
6	SBLTL003	ST 3.5 x 12 Screw	4	

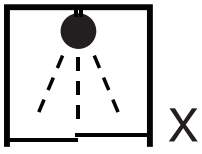


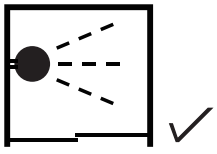
TRAY MUST BE SEALED FULLY AROUND WHERE THE TRAY MEETS THE WALL

TRAY MUST BE 100% LEVEL IN ALL DIRECTIONS

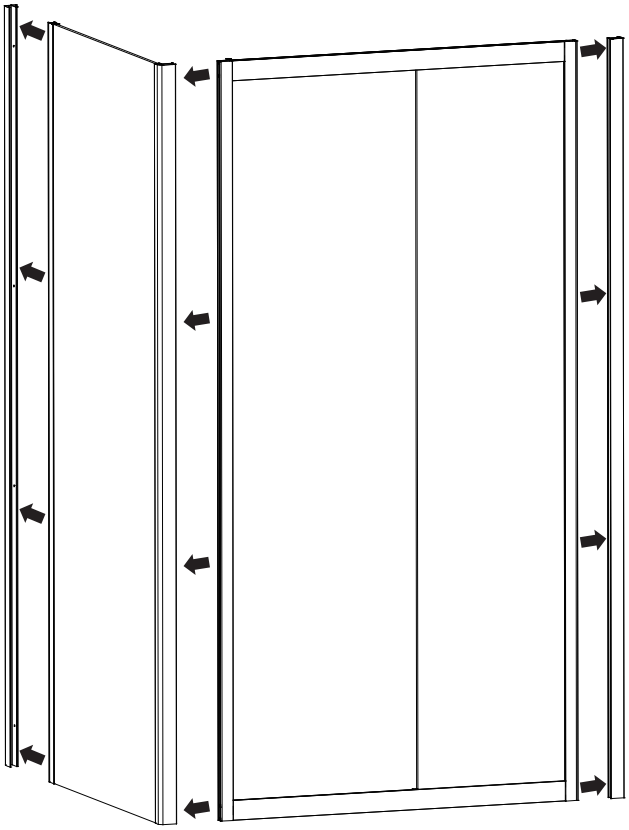
TRAY MUST BE 100% LEVEL IN ALL DIRECTIONS
TRAY MUST BE SEALED FULLY AROUND WHERE THE TRAY MEETS THE WALL

Ensure the shower tray is level in all directions and is properly sealed to the wall. The wall must be tiled down to the top edge of the tray. ***Do not angle out bottom tile.***





It is good plumbing practice and common sense to not install a shower head pointing at the opening of any shower enclsure.

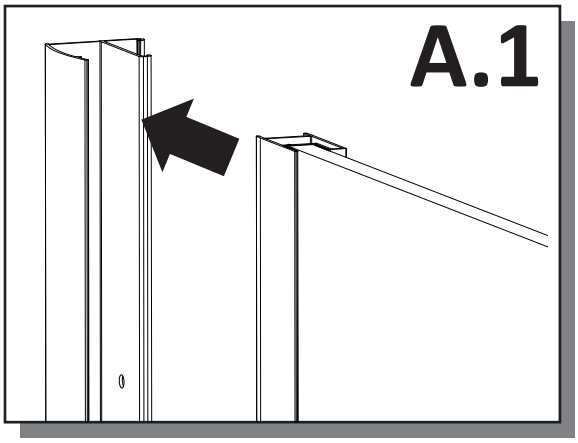


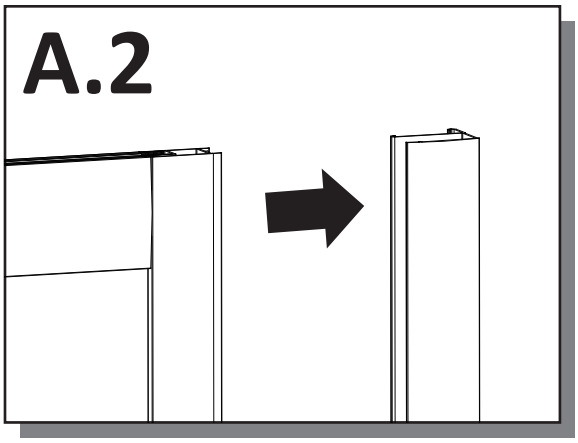
Step A

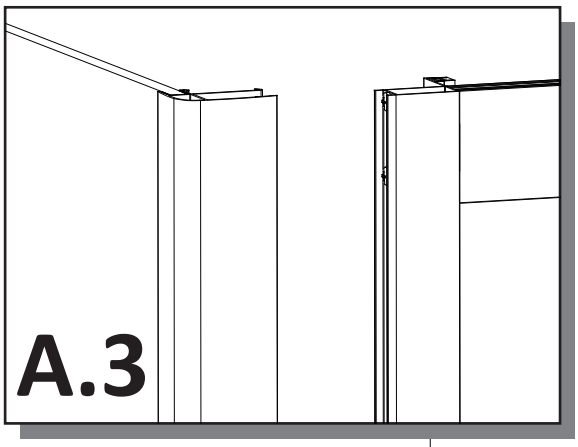
Position the assembled door frame with the side panel (with wall profile and corner post fully pushed into frame) onto the tray and decide on the step in from the edge of the tray to wall profiles. The wall profiles and corner post can be adjusted until the door is positioned correctly on the tray.

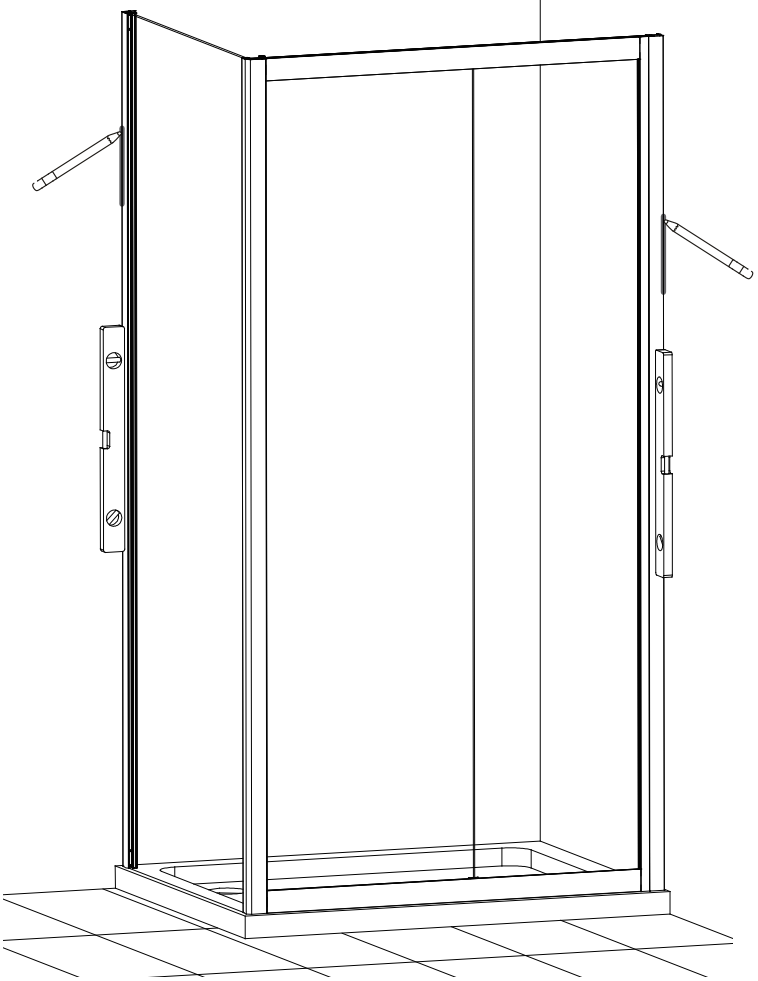
Step B

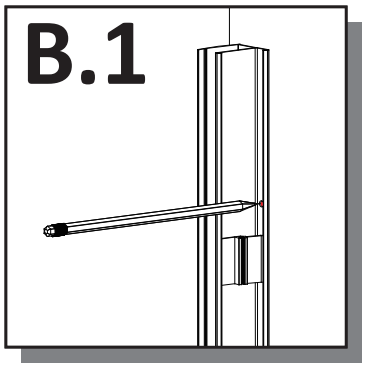
*Position the wall channels back on the tray ensuring the wall channels are plumb, mark the position of the holes in the wall. Do this by marking the wall with a pencil through the pre-drilled holes in the wall channel. Drill with **6mm** masonry drill bit and insert wall plug (**8 x SBLTL001**). Slot wall channels into the door frame, then lift door onto the tray. Fix the wall channel with screws ST4x30 (**8 x SBLTL013**). See next page.*

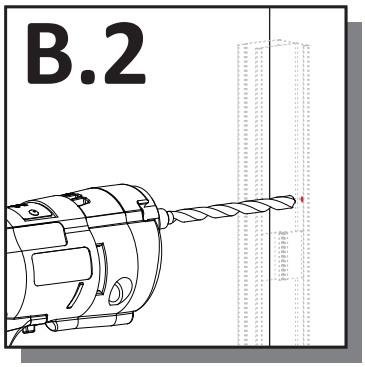






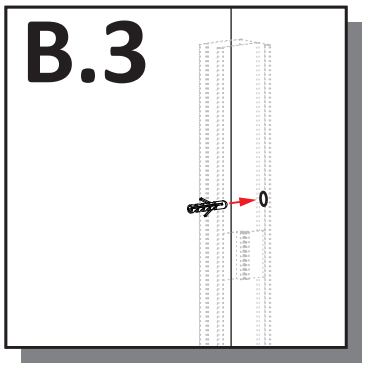


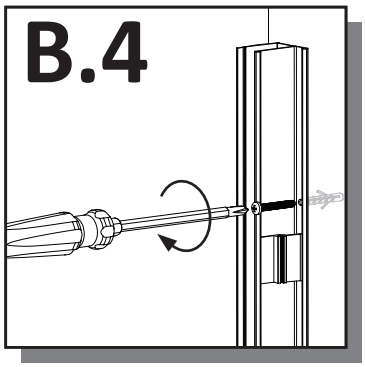




Step C

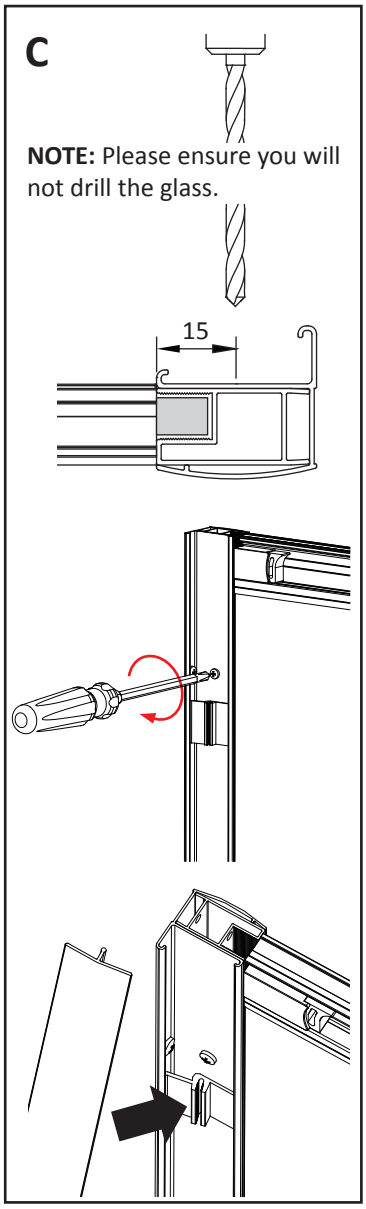
*Drill 3 equally spaced holes with **3mm** drill bit through the wall profiles and frame. Fix the frame to the wall profile with ST3.5 x 12 screws (**8 x SBLTL003**). Put the Cover Profiles (**2 x ALU13660**) on the plastic clip (**8 x S1PS20**).*

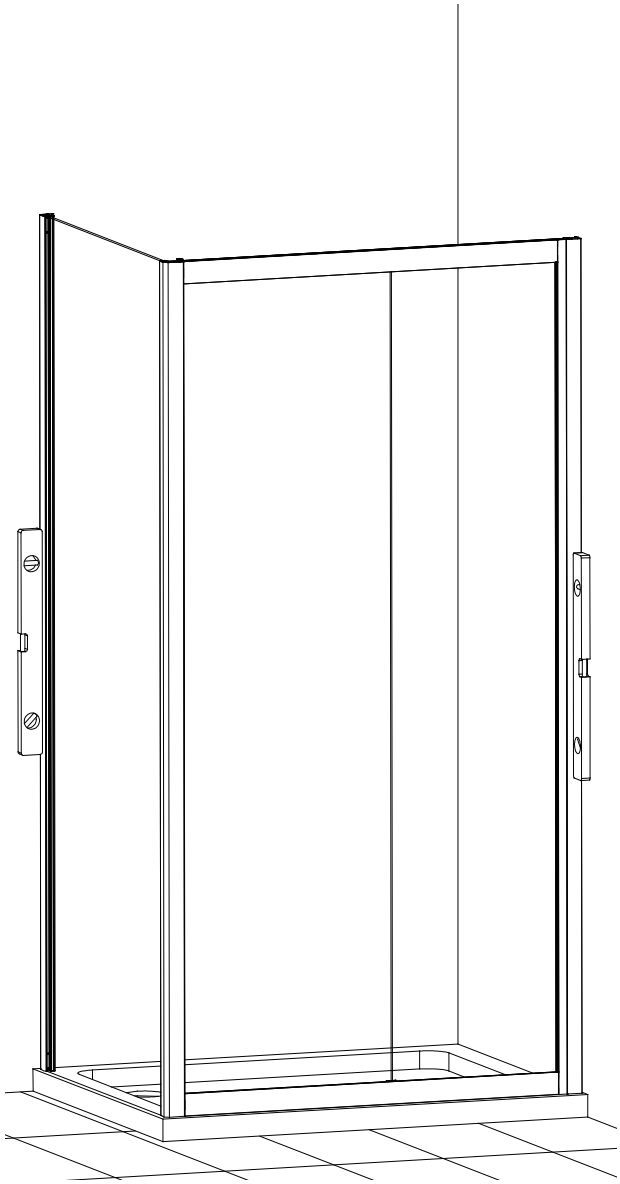


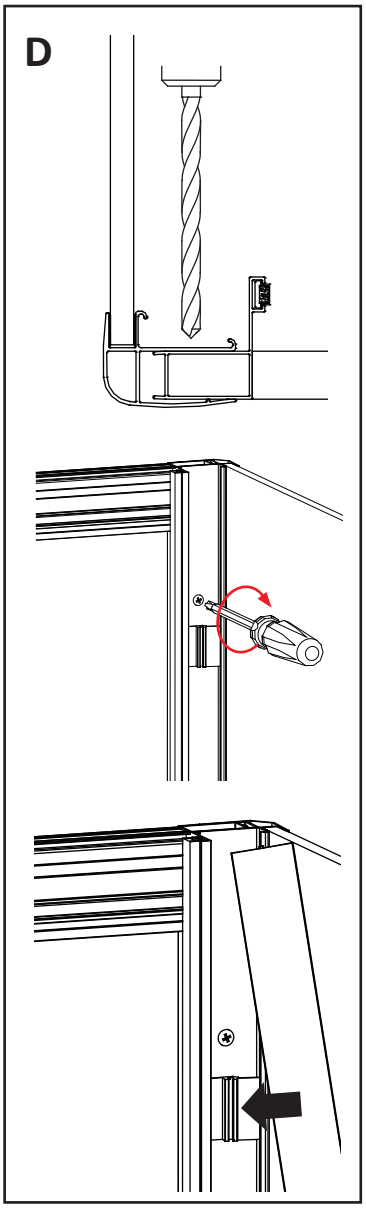


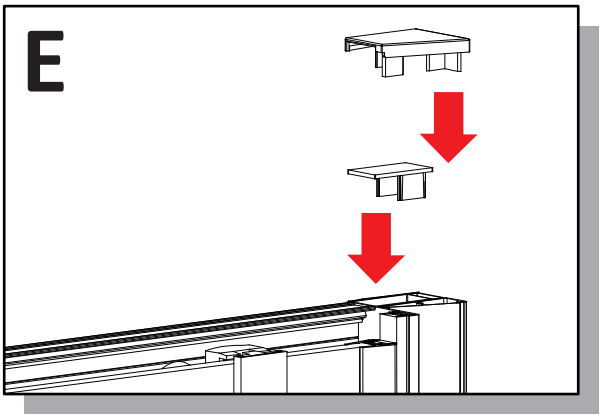
Step D

*Drill 3 equally spaced holes with **3mm** drill bit through the corner profile and frame. Fix the frame to the corner profile with ST3.5 x 12 screws (**4 x SBLTL003**). Put the Cover Profiles (**1 x ALU13660**) on the plastic clip (**4 x S1PS20**).*

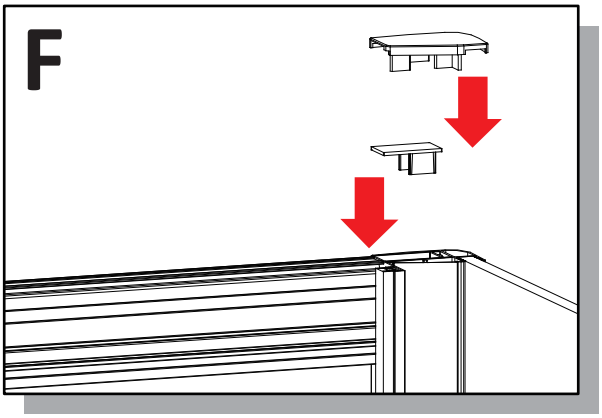




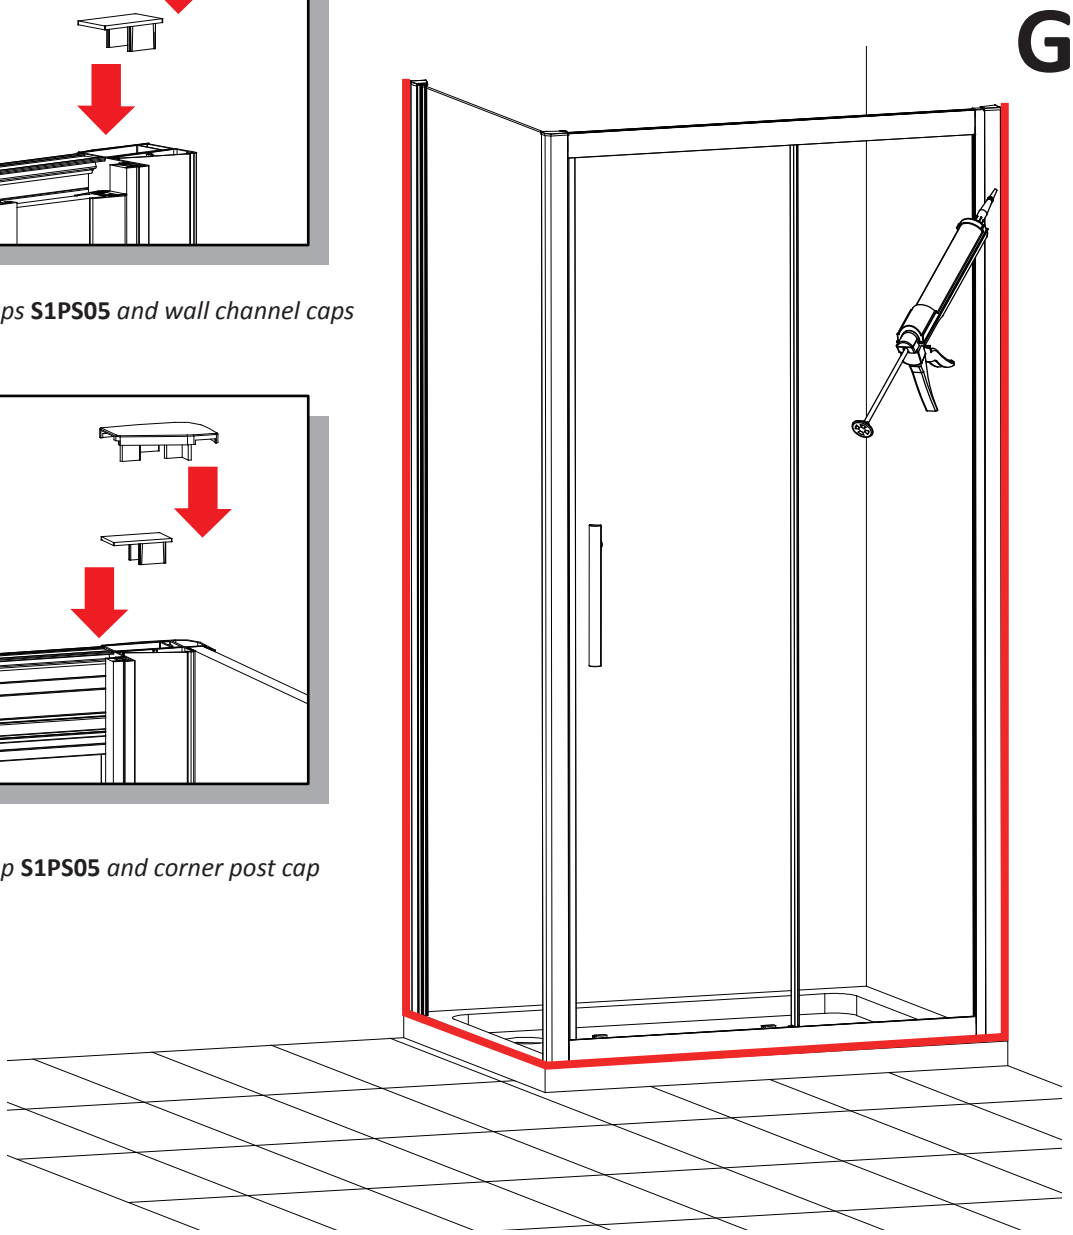




Step E
Put the upright profile caps **S1PS05** *and wall channel caps* **S1PS21L/R** *on.*



Step F
Put the upright profile cap **S1PS05** *and corner post cap* **S1PS38L/R** *on.*



DO NOT USE THE ENCLOSURE FOR 24 HOURS AFTER SEALING

Step G
Applying Silicone Sealant And Cleaning
Seal from the top of the wall channel to the bottom on the ***Outside*** *between the wall channel and the wall, and between the bottom profile and shower tray as shown. Wash down with clean warm water and a soft clean cloth or sponge. Please do not use bleach, alkaline or acid-based, aggressive or abrasive cleaning products.*
